## EXPERIENCE

---

### Applications Engineer

Lyons Consulting Group | Chicago, IL | 2017 - Present

LYONSCG is one of the industry's premier eCommerce digital agencies. LYONSCG crafts digital experiences for online retailers, branded manufacturers, and B2B organizations.

- Develop sites for clients such as Gymboree, E.L.F. Cosmetics, and NYDJ using the Salesforce Commerce Cloud/Demandware platform
- Implement features and apply bug fixes on the back end and client side using Javascript
- Style sites with Sass according to designer compositions
- Create internal company tools using MySQL, Node.js, Express.js, and Vue.js
- Write automated tests using Mocha, Chai, WebdriverIO, TestingBot, Selenium, and Gulp

### Contract Developer

Actualize | Chicago, IL | 2016 - 2017

Actualize is a coding bootcamp and apprenticeship program. I was hired by the bootcamp to work on internal projects and digital agency style projects for clients after completing the bootcamp.

- Created augmented reality mobile apps with the Unity Engine and Vuforia SDK
- Built REST APIs with Ruby on Rails
- Created a custom CMS for clients

### Web Developer Apprentice

The Difference Engine | Chicago, IL | 2016

The Difference Engine is a non-profit 501(c)(3) organization that builds custom software and websites pro bono for other non-profit organizations. This was a 4-month apprenticeship program.

- Pair programmed with a team of 5 in an agile scrum setting, reported to and worked directly with a product owner and tech lead in 2 week sprints
- Committed and pushed work to GitHub diligently, created detailed pull requests for code review
- Deployed to Heroku as deployment manager, wrote unit tests for code with RSpec
